Villeroy & Boch launches longer bath for growing population

Villeroy & Boch's Oberon bath is now available in a new 190cm length to accommodate Australia's ever taller population.

Median height has steadily increased since settlement, with the average Australian male now measuring 178cm according to the Australian Bureau of Statistics¹.

Villeroy & Boch's Oberon bath is a stylish oval shape featuring a smooth curved interior as well as rounded ends for a comfortable, tranquil soak. Oberon is made from Villeroy & Boch's exclusive material Quaryl offering an easy-to-clean pore-free surface, which prevents dirt accumulating and provides increased protection against scratches. Simple to install, Quaryl affords excellent heat retention and grants a high level of slip resistance. The design also allows the bath to be installed flush with surrounding tiling minimising any visible join.

As well as the new 190x90cm size, the bath is also available in 180x80cm, 170x75cm and 160x75cm sizes. Oberon can be fitted with an array of extra features to suit specific requirements. Villeroy & Boch's new Whisper™ Whirlpool system can also be incorporated infusing air into the water to create a champagne effect – perfect for unwinding after a busy day.
