Architectura washbasin

Omnia Architectura offers versatile design

Villeroy & Boch's new Omnia Architectura washbasin range comprises four different models for a wide range of design applications.

A predominantly classic design, the washbasin has been cleverly infused with a hint of contemporary style offering a versatile washbasin to complement numerous bathroom schemes.

The Omnia Architectura washbasin blends geometric lines with rounded corners and features a gently sloped basin. A wide rim prevents water splashing over the side and the back shelf offers space for toiletries.

The Omnia Architectura range consists of a hand washbasin, a compact hand washbasin, a compact corner hand washbasin and a semi-recess basin, which can be set into a bathroom cabinet.

Villeroy & Boch's Omnia Architectura washbasins are available with the company's exclusive Ceramicplus finish, offering an easy to maintain surface. Ceramicplus causes water on the surface of the washbasin to form droplets which roll off the surface and down the plug hole, taking lime and dirt residue with them. A further environmental benefit is that Ceramicplus eliminates the need for aggressive cleaning agents.

The Villeroy & Boch Omnia Architectura washbasin is priced from \$268.
