Variable washbasin offers flexible bathroom design

Variable washbasin

Villeroy & Boch has introduced the stunning new Variable washbasin, offering enhanced functionality for today's bathroom.

Increasingly, designers and homeowners are sourcing washbasins with sizeable shelf space on either side to allow toiletries and accessories to be displayed. Decorative vases and candleholders placed around the washbasin help to create a more relaxed bathroom environment.

By replacing large under or over-counter vanity units, this new washbasin series helps to achieve the minimalist style popular in many Australian homes.

The Variable washbasin is a smooth round bowl set into a long shelf. The relatively deep basin features a wide rim and juts out from the shelf providing a distinctive aesthetic.

Variable is available in five designs – a single centred washbasin with two options of shelf length, a single washbasin with the bowl positioned to the left or right hand side and a double washbasin, ideal for couples.

Villeroy & Boch's washbasins are available with the company's exclusive Ceramicplus finish, providing a surface which is easy to maintain and keep clean. Ceramicplus causes water on the surface of the washbasin to form droplets which then roll off the surface and down the plug hole taking lime and dirt residue with them. Ceramicplus offers environmental benefits by eliminating the need for aggressive cleaning agents.

The Villeroy & Boch Variable washbasin is priced from \$999.
