Argent Bottle Trap P - Trap

Argent Bottle Trap and Elbows

Argent Bottle Trap, Elbows and Wall Plate

Argent Bottle Trap S - Trap and Elbows

## Bottletraps<sup>plus</sup> By Argent

### The New Standard

Bathroom aesthetics and water technology are no longer unnoticeable, rather they are obvious through their form and functionality. Today's bathrooms expose a need for functional appealing products while exuding a simple, calming effect.

With its sleek stylish chrome body, the Argent Bottle Trap adds that designer touch to any modern bathroom. Compact in design and boasting a vast array of design innovations, Argent's Bottle Traps reduce that often cluttered look beneath many current basin designs, adding to the appeal of today's simplistic look.

The Argent Bottle Trap sets the new standard for bottle traps - engineered specifically to suit Australia's unique plumbing standards and gaining a WaterMark Certificate within Australian Standards. These range of products have also been designed with many innovative aspects such as its unique water connectors. These special devices make connection to the pvc waste pipe and the tapware unbelievably simple!

### Argent Bottle Trap

The Argent Bottle Trap gives you the choice for installation - through the floor or through the wall. In P-Trap or through the wall form, the trap offers a wide spectrum of height and distance variables that enable the basin to be positioned as close or as far away from the waste water pipe as you desire. In S-Trap or through the floor form, this trap gives any bathroom, new or existing, that designer touch! Argent Bottle Traps give the underside of your basin that simplistic look, whilst providing the ultimate in functional appeal.

### Argent Elbows and Wall Plate

Designed to meet the highest requirements in modern bathrooms, the Argent Elbows and Wall Plate form an integral part of the modern minimalist bathroom. These unique products address many of the problems associated with trying to cover the complicated fixings between basin mixers and water supply. Argent's Elbows fulfill the highest expectations with regard to quality and design underneath the basin. With two options available for the Elbow tube length, hoses and pipes underneath basins can be only a memory. Combine these with the new Argent Wall Plate and tiling inconsistencies disappear. No longer is it required to hide the fitting technology, Argent now provides stylish and elegant fittings to complete the design look.

### Plug & Waste

Complete the designer look of your bathroom using the Argent 32mm Plug & Waste. Suitable for installation with the Argent Bottle Trap, this waste is solid and sleek, the perfect partner in your new bathroom!
