*My House of Villeroy & Boch*

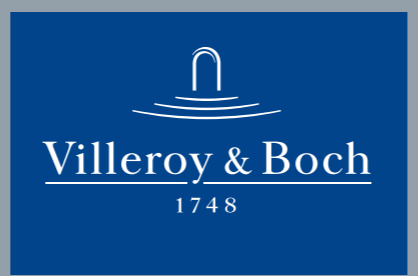

The world of bathing

### Freestanding

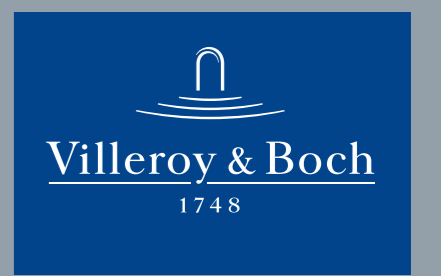

#### Aveo

The AVEO bath, designed by the world renowned design agency Conran & Partners, was inspired by the forms of an egg. Softly curved contours and an oval lineation provides the bath with an extraordinarily aesthetic presence. AVEO's unique support panel is made from one piece of Quaryl® to create an almost seamless appearance.

The AVEO Collection was winner of the 2003 designEX COMFIA Product Design Award for Bathroomware.

## Welcome

Step into the world of bathing with Villeroy & Boch. Modern, classic or nostalgic. Rectangular, oval or freestanding. There is a Villeroy & Boch bath to help you create your dream bathroom. And with the superior technology of Quarryl®, Villeroy & Boch baths provide a fresh, clean approach to bathroom design.

## The unique material Quarryl®

Quarryl®, developed by Villeroy & Boch, has revolutionised the bath design landscape. A natural hard mineral material, coloured throughout and filled with quartz, Quarryl® creates shapes and edges thought to be impossible until now. Quarryl® produces steeper walls, providing greater internal space in the bath and accurate corners and edges reduce sealant use, providing a clean, elegant finish.

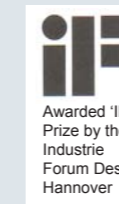

Quarryl® is pleasant to touch, absorbs sound, retains heat and is slip resistant. Furthermore the bath water temperature is assumed almost immediately throughout the entire bath preventing that unpleasant cold shock on exposed surfaces.

Quarryl®

### Squaro

1700 x 750 mm  
1800 x 800 mm

### Cetus

### Cetus

1900 x 800 mm

### Aveo

1900 x 950 mm

Quarryl®

**Top Left:** Fits a glove; precise angles and edges allow extremely narrow silicon joints - only three millimeters wide.

**Top Middle:** Harmonic transitions: Quarryl® baths can be installed flush with the tiles.

**Top Right:** The material thickness makes Quarryl® baths and shower trays solid. The elegant shine is a natural characteristic and it lasts for years.

**Bottom Left:** Environmentally friendly: Quarryl® is completely recyclable.

**Bottom Middle:** The non-porous surface is easy to clean allowing marks to be wiped away quickly.

**Bottom Right:** Accurately formed edges simplify a perfect installation.

## Rectangular

### Squaro

The art of clean lines - SQUARO is a prime example of clear design and thus the ideal choice for modern, timeless elegant bathrooms, made interesting by the unusual precision of the rims, and notable for the rectangular shape that is reflected in the contour of the base of the bath. Aesthetic appeal down to the smallest detail is guaranteed thanks to the use of Quarryl®, the unique material available exclusively from Villeroy & Boch. Comfort is enhanced not only the the depth of the bath but also by the optional headrest.

### Cetus

With its striking lines and softly rounded inner shape, CETUS pays homage to pure form. CETUS offers a choice of two models, one for modern practicality and the other with added length for that luxurious two person bathing experience. Both baths provide an accurately crafted rim and deep, softly curving form that will add distinction to your bathroom.

## Oval

### Cetus

With curving lines and a softly rounded inner shape, CETUS pays homage to pure form. The award winning design of the CETUS allows for creative installation. Its accurate curved rim and deep softly curving form, made possible by Quarryl®, will add distinction to your bathroom. While balanced proportions and a side mounted overflow makes bathing for two comfortable.
