REMOTE FUNCTIONS

The remote control is uncomplicated and intuitive, allowing users the ability to control all adjustable facets of the smart toilet seat. Functions on the remote include the front and rear wash, water and air temperature adjustability and nozzle positions.

Each function is available in five stages, allowing you to choose from ambient to warm water and air, soft to firm water and air pressure and massage or pulsating swing functions for a truly personalised experience.

The remote allows you to control the heated seat and nozzle positions, ensuring a total clean from front to back.

Intuitive in design, the remote lights up when you have selected a function, allowing you to easily identify your selected settings.
