

### Pan Installation

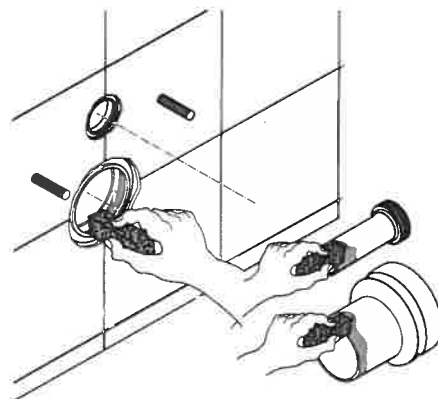

<p><b>1</b></p> 	<p><b>2</b></p>  <p>Insert the pipes into the installed cistern, mark the pipes where they cross the finished wall</p>
<p><b>3</b></p>  <p>Insert the other end of the pipes into the pan with the seals fitted</p>	<p><b>4</b></p> <p>Mark where it crosses the rear of the pan</p> 
<p><b>5</b></p>  <p>Measure the distance between the two marks and add 6mm for clearance</p>	<p><b>6</b></p>  <p>Trim that amount (including the 6mm) off both pipes</p>

7

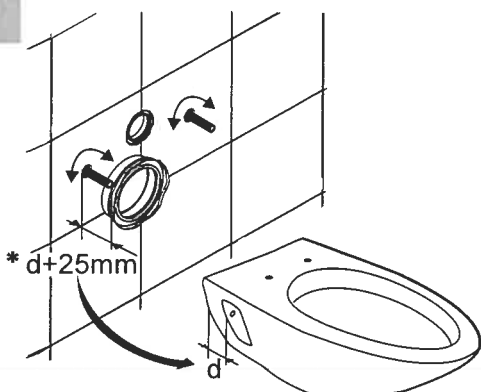

Clean and chamfer the cuts

8

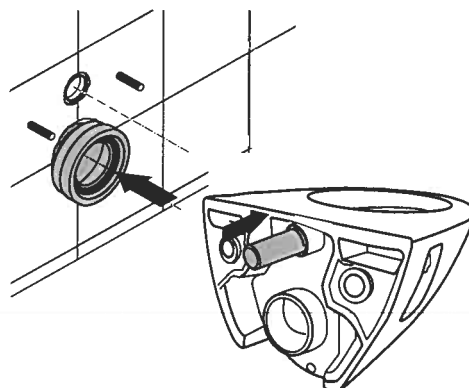

Lubricate seals and O-rings and insert trimmed pipes into position

9

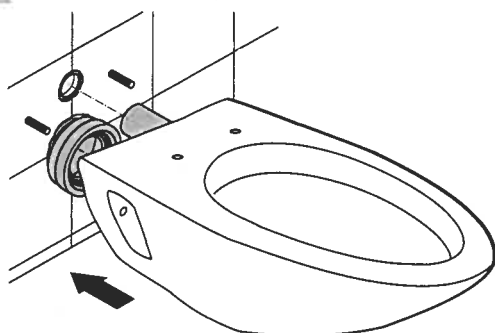

\*This will vary due to pan fixing. See pan installation

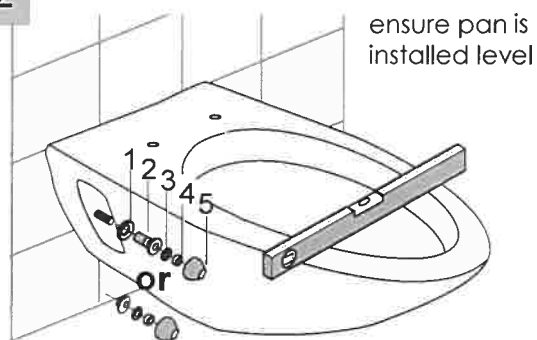

10

11

12

ensure pan is installed level
