

## B270-000 Bette Enamel Touch up tube

### Instructions for Bette Enamel repair:

1. Clean the affected area of rust, fat and dirt
2. Rough up the area to be repaired with sandpaper, avoid touching the non effected areas surrounding the damage
3. Spread the touch up paint on this area very lightly and let it dry
4. Repeat this procedure until the area is replenished
5. Many light coats with repeated applications will ensure the best result, make sure each coat has adequate time to dry in between coats, this can take up to 6 hours depending on conditions
