# A Smart Investment in Everyday Living.

---

Argent's Evoke Smart Toilet range epitomises contemporary refinement, blending advanced technology with enduring sophistication.

Available in two styles — Wall-faced and Back-to-Wall — Evoke is defined by smooth contours, clean lines, and a minimalist silhouette that enhances any bathroom style. Designed with both practicality and aesthetics in mind, the range strikes a harmonious balance between modern sophistication and hygiene. At its core are intelligent features that deliver an effortless balance of innovation and usability. The self-cleaning wand and UV sanitising mode support improved hygiene between uses, while GlazePlus, a premium ceramic glaze designed for easier cleaning and enhanced hygiene, creates a smoother, less porous surface that helps waste wash away more easily with every flush.

Adjustable smart functions offer a more personalised and comfortable experience, while features such as a heated seat, soft night lighting, and intuitive remote control add thoughtful comfort — creating a daily routine that feels both refined and reassuring.

Its discreet presence ensures effortless integration into any space, delivering a perfect combination of functionality and visual appeal for any interior.

# Features & Benefits

---

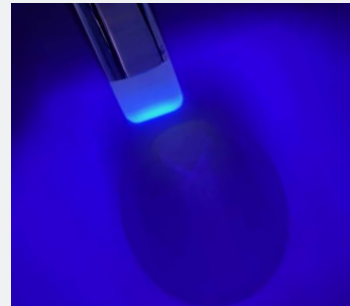

## Night Light

Soft LED light guides low-light visits without disrupting your sleep.

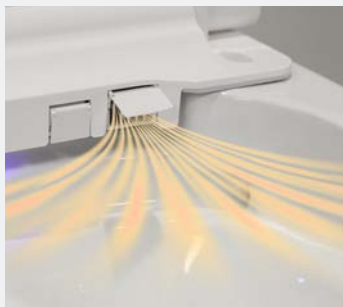

## Self Cleaning

Wand rinses automatically before and after use for added hygiene.

## UV Sterilisation

UV light sanitises the wand, bowl and seat underside between uses.

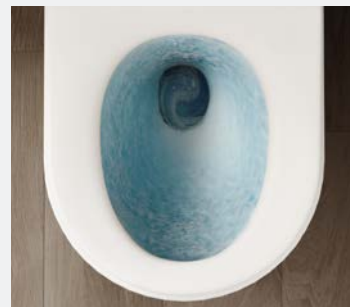

## Dryer Function

Warm air drying with adjustable settings for a touch-free finish.

## Seat Heating

Adjustable warmth for cooler mornings and night-time use.

## VortexFlush

Delivers superior hygiene with a powerful, full-coverage flush that maximises water efficiency.

## Smart Spray Function

---

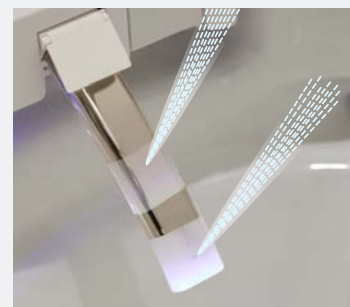

## Rear Wash

A gentle, targeted cleanse for everyday freshness and hygiene.

## Bidet Wash

Gentle front cleansing for intimate personal care and comfort.

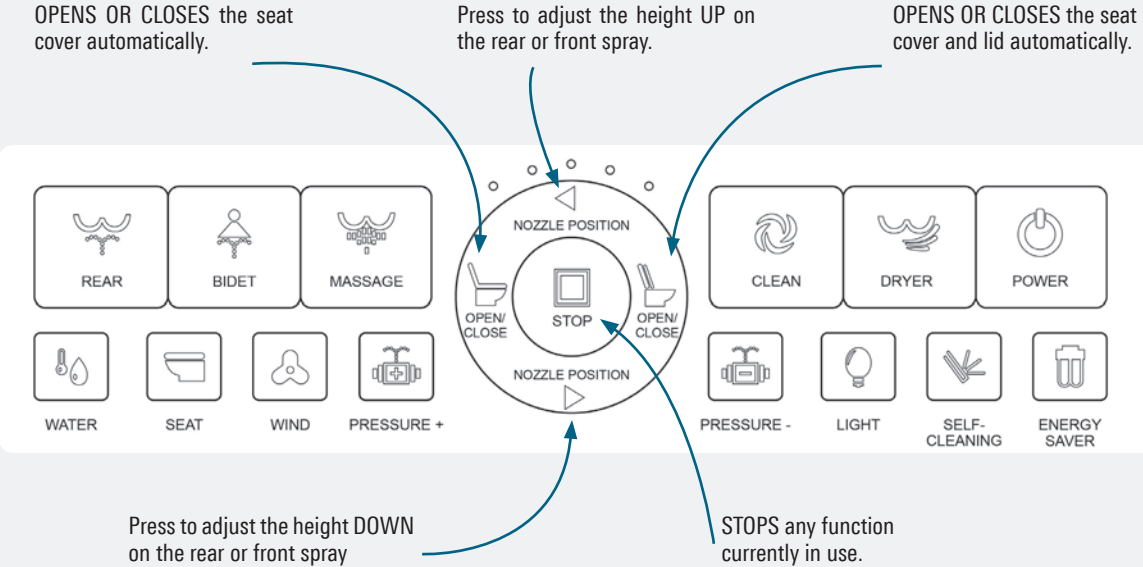

## Massage Wash

Pulsating spray pattern for a soothing and revitalising cleanse.

# Remote Control Features

Evoke's Smart Remote uses Bluetooth-like technology to connect with the toilet, eliminating the issues common with IR. Position, angle, or even fingerprints on the remote will not interfere with communication, ensuring consistent performance. With intuitive control, users can easily adjust settings through the remote for a seamless experience.

### Rear

A gentle, targeted cleanse for everyday freshness and hygiene.

### Bidet

Gentle front cleansing designed for intimate care and daily freshness.

### Massage

Activates a pulsating spray for a soothing, rhythmic cleanse.

### Water

Adjust the temperature of the cleansing spray for personalised comfort.

### Seat

Choose your preferred seat warmth for added comfort.

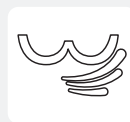

### Wind

Adjust the air temperature for a warm, touch-free drying experience.

### Power

Turns the unit on or off.

### Dryer

Starts the warm air drying function after cleansing.

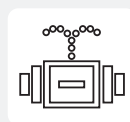

### Self-Cleaning

Extends and rinses the nozzle to maintain hygiene before and after use.

### Light

Turns the built-in night light on or off.

### Pressure -

Decreases the water pressure for a gentler wash.

### Pressure +

Increases the water pressure for a more powerful cleanse.

# Automatic Seat

## Sensor Activation

Lid opens automatically when a person approaches the toilet.

Tapping your foot near the sensor raises the seat for standing use.

The seat and lid closes automatically shortly after the user has left.

# Manual Side Dial

The convenient side dial activates key features without using the remote.

## Evoke Wall Faced Smart Toilet

---

Designed for in wall installation, the Wall Faced model pairs perfectly with the Villeroy & Boch or Argent Smart Cisterns and flush plates. Its sleek profile and concealed plumbing create a modern, space-saving profile perfect for new builds and minimalist bathrooms designs.

## Evoke Back To Wall Smart Toilet

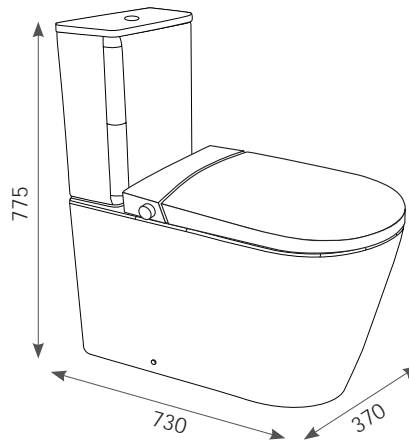

---

Evoke's Back to Wall model brings advanced functionality without the need for major renovations. Designed for use with standard plumbing and a power source, its single water inlet supplies both the flushing system and smart seat, simplifying installation and making it an ideal retrofit solution.
